

Looking after your business

Dispute Resolution

Litigation can be a lengthy and complicated process, but our dispute resolution lawyers will always find the best and most effective resolution to any commercial dispute, strategically, quickly and cost-effectively.

Our key principle is to work in partnership with you to avoid litigation in the first place and to deal with unavoidable disputes efficiently, commercially and sensitively.

This also involves consideration of alternative methods of dispute resolution, such as an early settlement meeting, arbitration and mediation. However, if this fails to end the dispute, we will provide expert help and support through a court case, providing commercial and cost effective advice.

We act for a variety of businesses nationally and regionally, ranging from small to medium-sized enterprises, through to major plcs.

Key services
